MESSAGE FROM THE FOUNDER

“

When I started Akiko Global Services Limited, it was fuelled by a simple yet powerful belief: that navigating the world of financial products, like credit cards and loans, should not be complicated. We saw a clear need to bridge the gap between financial institutions and individuals, making essential products more accessible to everyone. This belief is the passion that continues to drive us every single day.

At Akiko Global, our growth is powered by a unique blend of innovation and human connection. Our robust digital acquisition and aggregation models ensure a seamless, data-driven customer journey, while our 500+ skilled tele-calling professionals provide the personalized support that builds trust and drives conversions. This hybrid model—where technology meets empathy—enables us to reach a broader audience, deliver exceptional service, and connect the right customers with the right financial products, every time.

Akiko Global stands out in the financial distribution space with a unique hybrid acquisition model that blends the efficiency of digital with the trust of human interaction. While many competitors are either fully digital or agent-driven, we bring together the best of both worlds. Our strong online presence ensures a fast, seamless application experience, while our 400-member assisted team, backed by tele-calling support, provides personalized guidance—especially crucial for complex products like loans. This dual approach allows us to cater to varied customer preferences and achieve higher conversion rates, while our deep partnerships with banks and NBFCs further strengthen our reach and impact.

FY25 marked a pivotal year for Akiko as we achieved strong growth and financial stability. We closed the year with ₹76.3 crore in consolidated revenue, a robust ~97% YoY growth on a standalone basis. Our EBITDA stood at ₹11.53 crore with a healthy 15.10% margin, while PAT reached ₹7.39 crore at a 10.35% margin—reflecting our focus on profitability even as we expanded operations. With the successful consolidation of our subsidiaries and continued investment in digital infrastructure, we are well-positioned to enter new verticals like insurance and NBFC lending in the coming year. Our priority remains scaling sustainably while delivering long-term value to all stakeholders.

Looking ahead, our vision is to revolutionize how financial products are distributed. We aim to continuously enhance our digital capabilities while strengthening our assisted model, creating a truly integrated and customer-centric ecosystem. We believe that by combining cutting-edge technology with dedicated human support, we can empower more individuals and businesses to achieve their financial aspirations. We are incredibly excited about the future and grateful for the trust you place in us.
